

Dear California Board for Professional Engineers, Land Surveyors, and Geologists,

My name is Enri Marini and I am kindly writing to submit a complaint against several individuals who have a Professional Engineers license in the state of California.

I have attached a full copy of my complaint letter below, as well as supporting documentation.

The individuals in question that this complaint is being filed against, whose names and contact information are listed at the end of this letter, hold positions in a variety of highly influential institutions– including but not limited to the Los Angeles Department of Water & Power (LADWP), Los Angeles Department of Public Works (LADPW), and Los Angeles Department of Building Services (LADBS).

The grounds for my complaint are that these individuals have exhibited behavioral patterns of negligence, incompetence, aiding & abetting, and violating the Codes of Professional Conduct in their ongoing collusion with the Church of Scientology. As you will soon see, the common thread tying all of these folks together is their direct collusion with the Church of Scientology specifically to ensure Scientology is not held legally accountable for their gross repeated violations of the law. I want to emphasize that Scientology blatantly violating the law only to then have various government officials come run special unlawful favors for them to dodge accountability is a well-documented pattern of behavior.

The good news is you do not simply take my word for the above remarks regarding Scientology's pattern of behavior with violating the law – see the various court cases and video live streams of dozens of protestors in the past year mentioned below who have publicly captured video evidence of continued abuses enacted by Scientology. Cases like William Gude (@FilmThePoliceLA) v Joseph Ekers, William Gude v Francoise Koster, Scott Hochstetter (@iconoclasticgypsy) v Francoise Koster, Scott Hochstetter v Church of Scientology, Jasiah (@jasiahvlup333) v City of Los Angeles, Kamrin M (@LA_Kam7) v City of Los Angeles, Danny (@dannysimpact) v City of Los Angeles, Danny (@dannysimpact) v Scientology, Enri Marini v City of Los Angeles, Leslie Pearlman v City of Austin, Solomon Sassoon v Anthony D'Amato, and dozens more.

The goal of these frivolous suits being filed by Scientology against critics of Scientology are specifically to suppress their first amendment right, with one of the most egregious recent case involving a Scientology critic - who happens to be a minor - being sexually harassed by a known Scientologist & LAPD not arresting the perpetrator despite repeated violations of the restraining order placed against the perpetrator.

It is clear that despite the constant written and verbal notices granted to LADWP and LADPW, as well as the LA Board of Public Works, the leadership of these agencies are grossly negligent and incompetent in carrying out their duty to protect Angelinos. They have failed to protect Angelinos because they refuse to hold Professional Engineers, Businesses, and General Contractors lawfully accountable for violating the law – namely by allowing Scientology to conduct major construction without a permit, for allowing general contractors to operate major construction with an expired license, for not lawfully punishing general contracting companies for assaulting critics of Scientology, for allowing the Los Angeles Department of Building Services (LADBS) to not hold Scientology lawfully accountable for destruction of & barricading egress of public sidewalks, and for allowing LADBS to collude with Scientology to skirt regulations for barricading the entire public easement on

Fountain Avenue, L Ron Hubbard Way, & Catalina Street with planters that have no authorization or permits to be there.

If you thought it could not get any worse, this next part will shock you. A metal fabrication company named Cody Builders Supplies is owned by 2 Scientologists – Stacy and Tracy Springer. Stacy (wife) and Tracy (husband) are married. Their company is also the go-to metal fabrication company of choice for the city of Los Angeles, even being touted as so by the company itself. Stacy and Tracy are allegedly under investigation for the rape of a 14 year old (enacted by Tracy). Stacy allegedly had an affair with a 17 year old and to enact revenge on their partner, Tracy allegedly decided to have an affair with a 14 year old – which would constitute rape. This discovery comes to findings from court cases of Scientology critics in the state of Texas who have also been victims of Scientology's frivolous suits and police department corruption.

This is no longer a story about just general contractors and professional engineers enabling bad business practices. This is about allowing child predators to freely violate the law and prey on children. The only logical conclusion for this investigation is to permanently remove the Professional Engineer licenses for all of LADWP executive management and board, as well as the removal of the Professional Engineer licenses for all Los Angeles Public Works Board members, and the removal of the Professional Engineer licenses for the LADBS engineers who have signed off on procuring services from the metal fabrication vendor named Cody Builders Supplies. They are clearly unfit for service in this profession involving public work. They do not have the best interest of Angelinos and are actively putting Angelinos in harm's way by choosing to neglect repeat violations by Scientology & its affiliates.

The permanent removal of the Professional Engineer license of the in-house engineer at Omega Structural Inc., as well as the permanent removal of the general contractor's license of Omega Structural Inc.

It is shameful to the profession and to Americans everywhere that Los Angeles city officials collude with Scientology child predators, slave labor enacted by Scientology, and general contracting businesses that assault & make death threats to critics of Scientology.
